Notes and limitations

1. This statement is generated automatically from the public dataset cited above. It is not an award, an endorsement, or an evaluation of research quality, and it should not be used as a basis for hiring, promotion, funding or award decisions.
2. "Top 2%" refers to a relative position within a Science-Metrix sub-field, not to the top 2% of all researchers worldwide. Percentiles are computed against all researchers in the sub-field, including those who are not listed.
3. "Rank on the list" is the position among all researchers listed in that data version and list - across all sub-fields - ordered by the composite score excluding self-citations. It is a position within the published list, not a worldwide rank, and it is a different quantity from the sub-field percentile.
4. Institution names come from the researcher's most recent Scopus affiliation and may be out of date. The database has no author ID, so records that share a name and institution cannot always be told apart.
5. This site is not the creator of the underlying database and accepts no correction requests; to amend a Scopus profile use the Scopus-ORCID feedback wizard (orcid.scopusfeedback.com).
6. Verify the code above on this site to confirm that the figures match those recorded in the database.
